Installation accessories

PB500477

Mounting plate

- Plate provided with reinforcement flange around the entire perimeter. The vertical edges are provided with a triple fold, to prevent finger cuts.
- Depth adjustable with a pitch of 25 mm, provided with plastic shoe for easier sliding.
- Once the plate is fixed, in advanced position, the sliding shoe can be easily removed, to increase the available plate surface.
- Material: galvanised steel.
- Maximum load: 600 kg in the back of the enclosure and 500 kg in the intermediate position.
- Installation options:
– At the sides of the enclosure with the orthogonal brackets (see page **7/13**).
– Back-to-back, with the brackets for fixing the mounting plates in back-to-back position (see page **7/16**).
- In sets made up of two or more enclosures with mounting plates, it is possible to obtain a continuous plate surface using intermediate mounting plates (see page **7/15**).

Supply: one mounting plate and sliding shoes.

> **Advantage:**

The Spacial.pro tool helps determine the optimum dimensions of the mounting plate.

DB300568
> **Advantage:**

The triple fold of the vertical edges of the mounting plate contributes to increasing the latter's rigidity and increases handling safety by preventing finger cuts.

Mounting
Installation accessories
Intermediate fixing of the mounting plate, located in the back of the enclosure

- Support for additional fixing of the mounting plate, at any height of the plate, when the plate is mounted in the back of the enclosure.
- The supports minimise the vibration of the plate during the transport and operation of the panel.
- The supports are fixed to the structure when the plate is already located in the back of the enclosure.
- **Spacial SM:** fixing to 40-mm universal cross rails (1 row), installed vertically in the back of the enclosure, see page **7/35**.
- Material: zinc-coated steel.

Supply: ten units and fixing elements.

Reference by unit. Order by multiples of 10 (10, 20, 30...).

NSYSMPFB
Intermediate fixing of the mounting plate, in advanced position

- Support for additional fixing of the mounting plate, at any height of the plate, when the plate is mounted in advanced position.
- The supports minimise the vibration of the plate during the transport and operation of the panel.
- The supports are mounted on light cross rails or on 40-mm (1 row) universal or quick-fixing cross rails (not supplied) (see page **7/35**).
- Material: zinc-coated steel.

Supply: ten units and fixing elements.

Reference by unit. Order by multiples of 10 (10, 20, 30...).

Installation accessories

Reinforcement for mounting plate

● Reinforcement kit for transversal mounting plate.
● Provides extra rigidity to the mounting plates and absorbs vibrations.
● Can be used as a support for fixing very heavy elements.
● Material: zinc-coated steel.
● Thickness: 1.5 mm.

Supply: two profiles, four supports for fixing to the mounting plate and fixing elements.

Orthogonal brackets

● Orthogonal brackets designed for the installation of mounting plates on the sides of the enclosure.
● In the event of installing one plate in the back of the enclosure and one plate at the side, they must both be installed using orthogonal brackets.
● Maximum load (4 brackets): 600 kg.
● Material: zinc-coated steel.
● Spacial SFX: in order to mount the lateral mounting plate is necessary to remove the one on the back and its fixing brackets.

Supply: four brackets and fixing elements.

Intermediate mounting plate

- Intermediate plate used to obtain a continuous surface of the mounting plate at enclosure suites.
- Adjustable depth with a pitch of 25 mm. When the mounting plates are located in the back of the enclosure, the vertical profiles of the structure are flush with the plates, acting as an intermediate mounting plate. In this case the intermediate plate cannot be installed.
- Material: galvanised steel.

Supply: one intermediate plate and fixing elements.

Perforated mounting plate "telequick"

● Allows the installation of switchgear without drilling or screwing.
● Plate designed for quick fixing of switchgear by means of clip-on nuts ref. **NSYKNM3** to **NSYKNM6**.
● Fixing options:
– Directly to the vertical uprights of the structure, by means of self-tapping screws (only Spacial SF).
– To the technical vertical uprights, by means of sliding nuts, page **7/25**; to standard uprights by means of flat nuts, page **7/23** or self-tapping screws, and to cross rails.
● Vertical continuity is guaranteed by the vertical installation of plates.
● The top plate must be fixed in the third hole, 80 mm from the top frame.
● Material: zinc-coated steel.

Supply: one perforated mounting plate and fixing elements for technical uprights and screws for fixing to the structure or cross rails.

(1) Cut-outs 11 × 26 with a pitch of 15 × 30.

Combination examples

In the **Spacial SF**, **SM**, **SFX** and **SMX** enclosures, it is possible to create a fixing at any point of the inner volume, providing mounting planes with different widths, heights and depths.
In the case of the **Spacial SM**, it may be necessary to install vertical/horizontal adaptation profiles and 40-mm universal cross rails (1 row).

For the formation of structures inside the enclosure, it is possible to combine three types of cross rails:
– Universal cross rails of 40 (1 row), 65 (2 rows) and 90 mm (3 rows).
– Quick-fixing cross rails of 40 (1 row), 65 (2 rows) and 90 mm (3 rows).
– Light cross rails.
– Mounting plate sliding rails, see page **7/14**.

PB500465

PB500834

Mounting

PB500486
Spacial SF and SFX: the cross rails can be fixed to the structure and among each other, offering multiple possibilities.

PB500835
The universal cross rails allow installations at the same level, around the entire perimeter of the enclosure.
To perform this type of installation in a **Spacial SM** enclosure, the vertical adaptation profile and the vertical 40-mm universal cross rail (1 row) are required, mounted in the back of the enclosure.
PB500836

Spacial SF: the universal cross rails can be installed in vertical position.

PB500837

7

Mounting
The quick-fixing cross rails can be fixed directly to the structure, quickly and easily.
● **Spacial SF and SFX*:**
– They clip onto the structure and are fixed by M6 self-tapping screws, or optionally with M6 caged nuts.
● **Spacial SM:**
– Possibility of clipping onto the adaptation profile or another cross rail.
– Fixing by means of M6 self-tapping screws.
– Fixing by means of M6 caged nuts.

* In enclosures Spacial SFX is not possible to mount it in depth.

The quick-fixing cross rails can be used as a support for equipment in the back of the enclosure or offset with a pitch of 25 mm, using two universal cross rails in vertical position.
The main fixing point to the quick-fixing cross rails is the 5.2 mm drill hole for M6 self-tapping screw, although they can also receive M6 and M8 caged nuts.

(1) Cross rails only for fixing cables.

Mounting

Quick-fixing cross rails

- There are 3 models, according to width: 40 mm (1 row), 65 mm (2 rows) and 90 mm (3 rows), perforated with a pitch of 25 mm ($\varnothing$ 5.2 mm).
- Adjustable with a pitch of 25 mm.
- **Spacial SF:** they are fixed directly to the structure, quickly and safely. Clip-on plus screwing.
- **Spacial SM:** cross rails for depthwise fixing by means of adaptation profiles and 40 mm universal cross rails (1 row), or between cross rails in any other position.
- Material: zinc-coated steel.

Supply: two quick-fixing cross rails and fixing elements.

Mounting

Fixing elements

- **Caged nuts:** they are installed in the rectangular cut-outs of the structure and the cross rails.
- **Removable nuts:** they are installed in the rectangular cut-outs of the structure and the cross rails, easy to extract and reuse.
- **Screw with washer:** they make assembly easier in difficult-access locations.
- **Metric Torx screw:** to fix on the caged and/or removable nuts.
- **Torx self-tapping screw:** to fix on the structure or on the cross rails.

Tray installed on the structure.

PB500668

Tray installed on cross rails.

Fixed tray

● Options for fixing the tray to the enclosure:
– If the tray has the same dimensions as the enclosure:
  • **Spacial SF:** direct fixing to the structure.
  • **Spacial SFX:** instalation possible only with universal cross rails, see on page **7/35**.
  • **Spacial SM:** fixing by means of adaptation profiles and 40-mm universal cross rails (1 row) in vertical position.
– If the tray is smaller than the dimensions of the enclosure: fixing on depth cross rails.
  • Depth-adjustable tray with a pitch of 25 mm.
● Provided with cut-outs for improving air circulation inside.
● Material: steel.
● Finish: painted with epoxy-polyester resin, RAL-7035 grey.
● Acceptable load: 150 kg, evenly distributed.
● Tray height: 30 mm.

Supply: one fixed tray and fixing elements.

UCA connectors

● The UCA connectors are used to join symmetric C-shaped rails, types C20 and C40, forming a cross-shaped assembly of three rails located on the same plane, for example inside a frame.
● Material: zinc-coated steel.

Supply: 20 units.

References by unit. Order by multiples of 20 units (20, 40, 60, etc.).

Mounting
Rails

UTA connectors

- The UTA connectors are used to create a T-shaped assembly between two symmetric C-shaped rails, C20 and C40 types, especially recommended for forming crossbars on chassis and frames.
- The UTA42 connectors type allows C20 rails to be joined with C40 rails.
- Material: zinc-coated steel.

Supply: 20 units.

References by unit. Order by multiples of 20 units (20, 40, 60, etc.).

A (mm)	B (mm)	C (mm)	D (mm)	E (mm)	F (mm)	G (mm)	Reference

ECA connectors

- The ECA connectors are used to form a cross-shaped assembly with two symmetric C-shaped rails, C20 and C40 types, located perpendicularly on different planes.
- The ECA42 connector type makes it possible to join C20 rails with C40 rails.
- Material: zinc-coated steel.

Supply: 20 units.

References by unit. Order by multiples of 20 units (20, 40, 60, etc.).

DLM modular chassis

- The chassis consists of metal cut-out front panels, which can be clipped on without screws, structured finish, epoxy-polyester powder, RAL-7035 grey, on a rigid galvanised-steel structure.
- The depth of the chassis can be adjusted from 40 to 85 mm, between the rail and the front panel, allowing the installation of all types of devices.

Front-panel cut-out
(see page **7/71**)

DL modular chassis

Dinimel chassis designed for devices with heights of 53 and 68 mm, which can be coupled directly to the enclosure plate-support bolts. Manufactured from sheet steel. Metal protective cover plate, RAL-7035 colour.

● Distance between device rail and protective cover plate: 45 mm.
*For Spacial S3D please consult us.

Dimension F: Distance from the protective cover plate to the inside of the door.
Dimension G: Distance from the device-support rail to the rear of the enclosure.

Power distribution
Modular distribution

Modular distribution system

- The modular distribution system is made up of a range of accessories prepared for forming electric panels with high distribution capacity.
- The accessories are installed on a chassis mounted at the front of the enclosure, such as for example:
– Cover plates for enclosures with widths of 600 and 800, solid or cut-out in screwed-on or hinged versions. They cover 24 or 36 modules per row, depending on the width of the enclosure.
– Material support rails, fixed or with adjustable depth.
– Chassis supports for coupling non-modular equipment.
– Supports for fixing cable-distribution cable ducts.
- Sets of accessories made up of material-supporting frames with chassis and cover plates are offered for the construction of double or busbar modular chassis. All the accessories of the individual chassis system can also be combined in the same way with the double chassis or with the chassis with busbar area.

Modular distribution accessories

For ranges
SF, SM

- Schneider Electric has developed a broad range of accessories for the construction of modular distribution frames, meeting the needs of the market.
- The new range has a coupling chassis, installed at the front of the enclosure, allowing the installation of:
– Cover plates with lengths of 600 and 800 mm, plain and cut-out, screwed on and hinged, with heights of 150, 200, 300, 400, 450 and 600 mm.
– Material support rails, fixed or with adjustable depth.
– Mounting plate supports, plain or perforated, for installation of non-modular devices.

- For the construction of double modular distribution frames or with busbar chamber, specific coupling chassis have been created for these applications.

Power distribution
Modular distribution

For ranges
SF, SM
Single-chassis coupling set

- Chassis made up of vertical uprights and horizontal crossbars:
- **Spacial SF:** they are screwed to the front frame of the enclosure.
- **Spacial SM:** they are screwed to the front frame of the enclosure by means of the vertical adaptation profiles, see page **7/33**.
- Easy access to the inside for component installation.
- Material: steel.
- Finish: painted with epoxy-polyester resin, textured RAL-7035 grey.

Supply: two vertical uprights, two horizontal crossbars and fixing elements.

Plain cover plates

● Metal cover plates for protecting control devices.
● The cut-outs in non-modular control devices is at user's request
● Suitable by modules of 150 or 200 mm.
● Versions:
– Screwed-on plain cover plate.
– Hinged plain cover plate. 120° opening with flat hinge.
● Material: steel.
● Finish: painted with epoxy-polyester resin, textured RAL-7035 grey.

Supply: one plain cover plate and fixing elements.

Cut-out cover plates

● Cut-out metal cover plates for modular switchgear (1 module = 18 mm).
● Suitable by modules of 150 or 200 mm.
– Cover plates for 600-mm enclosures: 24 modules per row.
– Cover plates for 800-mm enclosures: 36 modules per row.
● Versions:
– Screwed-on cut-out cover plate.
– Hinged cut-out cover plate. 120° opening with flat hinge.
● Material: steel.
● Finish: painted with epoxy-polyester resin, textured RAL-7035 grey.

Supply: one cut-out cover plate and fixing elements.

630 A multi-stage bar support

● Support for fixing bars with cross-sections:
– 15 × 5.
– 20 × 5.
– 32 × 5.
– 32 × 8.
● The orientation of the copper bars makes tightening easier and allows better circulation of the cables.
● It can be 3-pole or 4-pole, with gauges from 160 to 630 A.
● Mounting on mounting plates (see page **7/10**) or cross-rails (see page **7/35**).
● Electrical characteristics:
– Rated peak withstand current Ipk (kÂ):
  • 30 kÂ for 160 A busbar.
  • 40 kÂ for 250 A busbar.
  • 55 kÂ for 400 A and 630 A busbar.
– Rated insulation voltage Ui = 750 V.
● Material: insulating plastic.

Supply: 1 multi-stage bar support and fixing elements.

● M6 × 25 self-tapping screws are required for fixing on the cross-rails, not included.

Reference
04192

● The following table shows:
– The cross-section of the bars that will be used according to the current-carrying capacity in the busbar.
– The distance between the bar supports that will be installed according to the rated short-time withstand current: Icw.

Amperage (A)	Bar cross-section (mm)	Centre-to-centre distance of the supports (mm)

Busbars and blocks
Screen for 630 A multi-stage busbar
● Protects against direct contact from the front in the connections of the busbar.
● Direct mounting on the actual support.
● Length: 1500 mm.

Supply: 1 screen for multi-stage busbar and fixing elements.

Reference
04197

160 A / 630 A four-pole multi-stage distribution block
● The orientation of the copper bars makes tightening easier and allows better circulation of the cables.
● The copper bars are supplied with:
– 13 holes for M6, for the outlets.
– 4 holes with ⌀ 12.2 for supplying the distribution block.
● It can be 3-pole or 4-pole, with gauges from 160 to 630 A.
● Installation:
– Mounting plates (see page **7/10**) or cross-rails (see page **7/35**).
● Electrical characteristics:
– Rated operating current (40 °C):
  • 160 A.
  • 250 A.
  • 400 A.
  • 630 A.
– Rated insulation voltage Ui = 750 V.
– Rated short-time withstand current = Icw:
  • 10 kA eff/1 s for 160 A distribution block.
  • 13 kA eff/1 s for 250 A distribution block.
  • 20 kA eff/1 s for 400 A distribution block.
  • 25 kA eff/1 s for 630 A distribution block.
– Rated peak withstand current = Ipk:
  • 30 kÂ for 160 A distribution block.
  • 30 kÂ for 250 A distribution block.
  • 40 kÂ for 400 A distribution block.
  • 40 kÂ for 630 A distribution block.
– Rated impulse withstand voltage: Uimp = 8 kV.
● Distribution: 13 outlets for phase with max. 50 mm^2.

Supply: 2 multi-stage bar supports, 4 cut-out copper bars with a pitch of 25 mm and 1 IPxxB insulating front cover.

● M6 × 25 self-tapping screws are required for fixing on the cross-rails, not included.

Power distribution
Busbars and blocks

Distribloc distribution block

- 4-pole distribution block.
- The outlets are connected by the front, on spring terminals. The pressure of this spring is adapted automatically to the cross-section of the conductor. It is independent from the operator.
- Degree of protection: IPxxB (protection against direct contacts).
- Installation:
– Clips onto DIN rails (see page **7/50**) and/or mounting plates (see page **7/10**).
- Electrical characteristics:
– Rated operating current (40 °C):
  • 125 A for Distribloc 125.
  • 160 A for Distribloc 160.
– Resistance to short-circuit currents: the interrupting capacity reinforced by filiation is conserved in the case of automatic switch associations.
– According to low-voltage switchgear standards UNE-EN 60947-7-1 and/or UNE-EN 60439-1.
– Rated impulse withstand voltage: Uimp = 8 kV.
- Power supply:
– 125 A Distribloc: screw terminal for flexible cables from 6 to 35 mm^2 (rigid from 10 to 35 mm²).
– 160 A Distribloc: by prefabricated flexible connection, supplied.
- Distribution (for 125 A and 160 A Distribloc):
– On spring terminals:
  • 2 outlets connected by flexible cables from 1 to 10 mm^2.
  • 3 outlets connected by flexible cables from 1 to 6 mm^2.
  • 7 outlets connected by flexible cables from 1 to 4 mm^2.
– On screw terminals:
  • 1 outlet connected by flexible cables from 4 to 16 mm² (rigid from 4 to 25 mm^2).

Supply: single-piece distribution block, 1 IPxxB modular insulating screen and self-adhesive labels for identifying the phases. Prefabricated flexible connection in Distribloc 160.

Model	Reference
125 A distribution block	**04045**
160 A distribution block (with 4 flexible connectors)	**04046**
Power distribution
Busbars and blocks
Multiclip distribution block

● Distribution in a full row (48 steps) of modular switchgear. Generally supplied on a busbar.
● The outlets are connected by the front, without screws on the spring terminals. The contact pressure of the cable is independent from the operator.
● It adapts automatically to the cross-section of the conductor (min. cross-section 1 mm^2).
● Each spring only accepts one flexible cable at a time.
● Degree of protection: IPxxB (protection against direct contacts).
● Installation: clipped onto the rear of a modular rail, for example Ref. 03004, or screwed on mounting plates (see page **7/10**).
● Electrical characteristics:
– Rated insulation voltage: Ui = 750 V.
– Rated impulse withstand voltage: Uimp = 8 kV.
– Resistance to short-circuit currents: the interrupting capacity reinforced by filiation is conserved in the case of automatic switch associations.
– 200 A Multiclip:
  • 10 mm^2 cable outlet: Imax = 50 A.
  • 2 different outlets with cables of 10 mm^2: Imax = 63 A.
● Distribution:
– For 2-pole 200 A Multiclip (04012):
  • 12 phase and neutral connection points.
– For 3-pole and 4-pole 200 A Multiclip (04013 and 04014):
  • 12 connection points for each phase.
  • 18 connection points for the neutral.

Supply: Multiclip distribution block, 10 mm^2 bared copper connections with a length of 100 mm, 2 bags of 12 connections, terminal covers for the supply poles (IPxxB), screws for the supply poles and fixing elements.

2800	100 × 10	2	650	650	650	650	325	325	325	217	163

Note: The current-carrying capacity values in the set of bars are given for an ambient temperature of 35 °C around the busbar.
The nominal rating values are indicated for IP55. The maximum values (3200 A) are achieved with ambient temperatures of less than 35 °C, varying according to the configuration and position of the busbar.
See enclosed table of current-carrying capacities according to temperature, page **7/95**.

Power distribution
Busbar support accessories

Selection of the number of supports

● The number and cross-section of the bars are chosen for each phase, according to the nominal rating.
● Determine the short-circuit current Icw (kA) and use the table to obtain the maximum distance between supports.
● Based on the maximum distance between supports, obtain the number of supports to be installed according to the following criterion:
– Three vertical supports must necessarily be fixed to the structure (ref. **NSYBVS**...).
– If more than three supports are required, the support arms must be used (ref. **NSYBSA**), in even numbers (2, 4, etc.).
● Example:
In: 2000 A, two 60 × 10 bars are required per phase.
Icw: 50 kA.
According to the table of maximum distance between supports they must be 325 mm.
Length of the copper bars: 1800 mm.
1700/325 = 5.23, which means 6 supports, 3 fixed vertical supports and 3 support arms + 1 extra support for the number to be even.

Note: The current-carrying capacity values in the set of bars are given for an ambient temperature of 35 °C around the busbar.
The nominal rating values are indicated for IP55. The maximum values (3200 A) are achieved with ambient temperatures of less than 35 °C, varying according to the configuration and position of the busbar.
See enclosed table of current-carrying capacities according to temperature, page **7/95**.

SFM054_002_006.indd

Power distribution
Busbar support accessories

For ranges
SF, SFX

Selection of the number of supports

- The number and cross-section of the bars are chosen for each phase, according to the nominal rating.
- Determine the short-circuit current Icw (kA) and use the table to obtain the maximum distance between supports.
- Based on the maximum distance between supports, obtain the number of supports to be installed according to the following criterion:
– Two supports must necessarily be fixed to the structure per enclosure. In the event of enclosure suites, only one support is required, fixed to one of the uprights of the coupling.
– If more than two supports are required per enclosure, the support arms must be used (ref. **NSYBSA**).

Table of current-carrying capacities according to temperature

Type of bars		Current-carrying capacity (A) according to the ambient temperature around the frame				
Cross-section (mm)	No. of bars per phase	25 °C	30 °C	35 °C	40 °C	45 °C
60 × 5	1	840	790	750	700	650
80 × 5	1	1050	990	900	870	810
60 × 5	2	1420	1350	1250	1180	1090
80 × 5	2	1820	1720	1600	1510	1390
50 × 10	1	1220	1160	1080	1010	940
60 × 10	1	1400	1320	1250	1160	1070
80 × 10	1	1800	1700	1600	1500	1390
50 × 10	2	2090	1980	1850	1740	1610
60 × 10	2	2270	2140	2000	1870	1720
80 × 10	2	2820	2660	2500	2330	2160
100 × 10	2	3200	3100	2800	2720	2510

Note: The rating values according to temperature are not exhaustive, since they depend on the configuration and position of the bars inside the enclosure.

Bar support arm

- Support without fixing to the enclosure, required to guarantee the distance between the bars.
- It is used on bars in both vertical and horizontal position.
- To choose the number of supports, see the tables of maximum distances between supports, pages **7/86**, **7/91** and **7/94**.

Supply: two insulating bar supports and fixing elements.

Sigma safety terminals

Safety terminals made from self-extinguishing Polyamide-6, with matt black base, **MS-58** brass terminal (DIN 17660), tempered, zinc-plated and dichromated steel ring, and cover made from orange-coloured self-extinguishing polypropylene.
● Anti-shearing: the connection is made by means of a tightening mechanism, which distributes the pressure across the entire contact surface, avoiding friction and occasional stress that can damage the conductors.
● Unloosenable: the ring that surrounds the brass body guarantees that the pressure exerted by the actual conductors cannot open the terminal and loosen the connection.
● Full insulation: all the SIGMA "S" terminals are supplied with a terminal-covering cap, avoiding any accidental contact with live parts.
All the gauges can be coupled together, forming strips of any length. Operating voltage: 500 V.

Cable management
Cable entries

Mixed membrane entries for IP 55 direct cable entries

Common accessories for the Thalassa and Spacial offers

- Membrane entries with multiple membranes.
- IP 55.
- RAL 7035.
- Patented concentric cutting. A simple screwdriver is enough. Enables ultra-quick connection with the choice of several cable diameters for the same membrane entry.
- Material: SBS.
- Minor packaging of 10 pieces.
- Warning: The IP becomes 55.
- Suitable for walls from 2 to 3.2 mm.

∅ (mm)		Minor pack.	References and colours	
Drill hole	Cable / conduit		RAL 9010 white	RAL 7035 light grey

IMT36172   IMT36173   ISM71073   ISM71074
ISM71071   ISM71072

Installation of IP 55 entries

- Insertion of rigid cables:
– Strip at least 100 mm.
– Push the wires through the membrane.
- Insertion of flexible cables:
- Pierce partially and soften the membrane with a 4 to 5.5 mm screwdriver.
– Pass the cable through the membrane.
- Insertion of conduits:
– Peel the necessary step: 16, 20, 25, 32 or 40 mm.
– Push the conduit.

IP 67 quick cable entries

- IP 67.
- Material: EPDM plastic.
- Suitable for walls from 1 to 4 mm (0.5 to 2 mm for ref. **IMT36179**).
- Quick installation with no tools.
- Installation direction: the conical part is inside the box.

ISO	∅ of drill hole	Cable ∅ (mm)	Minor pack.	Reference

M40	40.7	20 - 26	25	IMT36184
M50	50.7	26 - 35	25	IMT36185

Application

- Push the cable entry into the hole. The conical part must be inserted into the box.
- Prepare and loosen the cable entry with a screwdriver. Pass the cable through the cable entry.
- Pull the cable back slightly to fix it in place. The installation is complete.

- IP 68, 5 bars.
- According to standard IEC 62208.
- RAL 7035 grey.
- Material: PA6, neoprene gasket.
- Usage temperature: – 30 ... + 80 °C up to + 150 °C intermittently.
- The cable-glands are supplied with nuts.
- The IP is guaranteed with no gasket between the cable-gland and the thermoplastic box. A gasket available as an accessory guarantees the seal in the event of installation on a steel enclosure.
- The cable-gland (ref. **IMT36150**) is especially recommended for security circuits (glow wire resistance: 960 °C).
- Pack of 20 (M12 to M20), 10 (M25 and M32), 5 (M40).

Multi-cable disc

Cable-gland gasket

- Batch of 100 (M12 to M25), 50 (M32), 25 (M40).

Multi-cable disc

- It is possible to pass several cables through a single cable-gland using the multi-cable bushing.

Blanking plug

Blanking plug

- It is screwed into the cable-gland's place.
- Pack of 20 plugs (M12 to M15), 10 plugs (M32), 5 plugs (M40).

Transport plug

Transport plug

- It is installed to block the cable-gland during transport or during maintenance operations.
- Pack of 20 plugs (M16 to M25), pack of 10 (M32), pack of 5 (M40).

Lower cable-guide cross-rail

● It allows quick fixing of cables entering and exiting the enclosure.
● Depth adjustable every 25 mm.
● Spacial SF: for suitable enclosures with widths of 1200 and 1600 mm, use the adaptation kit for 2-door suitable enclosures, see page **7/19**.
● Spacial SM: for floor-standing enclosures with a width of 1200 mm, a top/bottom mounting rail installed in central position is required.
● Spacial SFX: no adaptation piece is required for the 1200 mm suitable enclosures.
● Spacial SMX: no adaptation piece is required for the 1600 mm floor-standing enclosures.
● Material: galvanised steel.

Composition: 1 cable-guide cross-rail and fixing elements.

Fixing support for corrugated tube

- Fixing support for corrugated tube; it offers the following mounting options:
– Directly on the enclosure.
– On a 19" swing rack and/or on cross-rails, by means of a fixing point.
- The supports can be assembled with one another to form sets of tubes that allow a better arrangement of the cables.
- The support is supplied with its cover.
- It allows the rotation of the tube once it is fixed on the support and prevents the corrugated tube from coming loose if subject to pulling movements.
- Material: polyamide (PA), black.

Composition: 10 units and fixing elements.

Door switch

● Switches on enclosure/rack lighting when the door is opened.
● For other applications (air conditioning control, power distribution rails...), a supplementary contactor may be needed.
● Not compatible with some electronic application enclosures. Please contact us.
● Not compatible with modular distribution system.

Supply: 1 door switch and fixing elements.

Environment characteristics

● Conforming to standards:
  Products: IEC 60947-5-1, EN 60947-5-1, UL 508, CSA C22-2 nº 14.
● Ambient air temperature:
– Operation: –25 to +70 °C.
– Storage: –40 to +70 °C.
● Electric shock protection:
  Class II conforming to IEC 61140 and NF C 20030.
● Degree of protection:
  IP 65 conforming to IEC 60529; IK 04 conforming to EN 50102.
● Materials:
  Bodies: Plastic.

Contact block characteristics

● Rated operational characteristics:
  $\sim$ AC-15; A300 (Ue = 240 V, Ie = 3 A); Ith = 10 A.
  $=$ DC-13; R300 (Ue = 250 V, Ie = 0,1 A), conforming to IEC 60947-5-1 Appendix A. EN 60947-5-1.
● Rated insulation voltage:
– Ui = 500 V degree of pollution 3 conforming to IEC 60947-1.
– Ui = 300 V conforming to UL 508, CSA C22-2 nº 14.
● Positive operation:
  N/C contacts with positive opening operation conforming to IEC 60947-5-1 Appendix K, EN 60947-5-1.
● Rated impulse withstand voltage:
  U imp = 6 kV conforming to IEC 60947-1, IEC 60664.
● Short-circuit protection:
  10 A cartridge fuse type gG (gl).
● Cabling:
  Screw clamp terminals: Capacity, min: 1×0.34 mm², max: 2×1.5 mm².

Fluorescent lamp with E27 bulb base

● Available in three versions:
– With motion sensor.
– With On-Off switch.
– Portable lamp with simple support, power cord and plugs.
● The references **NSYLAMDP** and **NSYLAMIN** allows the connection terminal for serial connection of a door switch and another lamp.

Designation	Reference	Fixation
Lamp with motion sensor	**NSYLAMDP**	Screws or magnetic*
Lamp with on/off switch	**NSYLAMIN**	
Portable lamp	**NSYLAMPO**	Adhesive

* It is impossible to fix it magnetically in stainless steel enclosures.

Technical characteristics

● Power consumption: 20 W.
● Voltage: 220 V / 50 – 60 Hz.
● Luminosity: 1000 Lm.
● Service life: 10000 h.
● Switch: Movement detector PIR, 3 min. lasting aprox.
● Connection: 4-pole screw connector 2.5 mm² (torque 0.5 Nm max.).
● Casing: Plastic according to UL94 V-0, light grey.
● Weight: Approx. 0.60 kg.
● Fitting position: Variable.
● Operating/Storage temperature: –20 to +50 °C (–4 to +122 °F) /
                                  –45 to +70 °C (–49 to +158 °F).
● Protection type/Protection class: IP20 / II (double insulated).
● According with the standard: IEC 55014 and IEC 50082-1.
